SUMMARY

Product-focused Mobile Developer specializing in Native Android, Native iOS, and Flutter, building AI-powered, scalable, user-centric applications with Clean Architecture and modern frameworks. Proven at taking products from idea to production and helping startups and agencies ship faster with reliable, high-quality mobile solutions.

SKILLS

Kotlin, Jetpack Compose, SwiftUI, Flutter, Dart, Java, XML, MVVM, Clean Architecture, BLoC, Coroutines, Supabase, Firebase, TFLite, ML Kit, AI Integration, REST, GraphQL, Optimistic UI

EXPERIENCE

Mobile Developer & Team Lead – Plottwist.org	2025 - Present
▪ Led 4+ projects simultaneously , managing the team, distributing tasks, and mentoring developers.	
▪ Designed and developed AI-powered applications , delivering scalable, user-centric solutions.	
▪ Oversaw full project lifecycle from concept to App Store and Play Store release .	
▪ Accelerated delivery with fast development, boosting client satisfaction and engagement.	

Freelance Mobile Developer (Self-Employed)	2020 - Present
▪ Developed 50+ production mobile apps across fintech, health-tech, entertainment, and AI.	
▪ Helped clients increase revenue by up to 3x through optimized, high-quality mobile solutions.	
▪ Delivered reliable, maintainable applications that scaled with user growth and business needs.	

KEY PROJECTS

Heal Tone AI Frequency Sounds Flutter Android · iOS	Apr 2025 - Present
▪ Led development of an AI-powered wellness app that simulates human-like therapy interactions.	
▪ Implemented real-time audio frequency processing for personalized sessions in the background, improving user engagement and retention.	

eMaisha Pay Jetpack Compose Android	Jul 2021 – Dec 2025
▪ Transformed manual processes for African agri-traders by developing a streamlined payment app, reducing operational time by 70% and boosting transaction efficiency.	

Santa Personal Video & Call Native Android · iOS	Oct 2025 – Dec 2025
▪ Developed AI-powered real-time video and audio experiences using Jetpack Compose, SwiftUI, AI Video (Sora2), and AI Call (Elevan Labs), achieving <200ms latency.	
▪ Enabled quick 12-second AI-generated videos with personalized responses, enhancing interactivity.	

DeenHub: Quran, Prayer & Qibla Flutter Android · iOS	Mar 2025 – Nov 2025
▪ Developed an AI-powered Quran & Hadith system, boosting retrieval accuracy 85%.	
▪ Combined local-first caching with Supabase for large databases and added a nearby mosque finder, improving accessibility and engagement.	

EDUCATION

B.Sc. in Computer Science & Engineering	Oct 2024 - 2028 (Expected)
Rajshahi University of Engineering & Technology (RUET)
